

Occupational Therapy Services

"Making It Possible"

Pediatric Possibilities is offering Summer Camps!

- The main goal of our camps is to have fun through a curriculum which will facilitate (1) sensory exploration, integration, and self-regulation, (2) core strength, upper body control, and endurance, (3) fine and gross motor skills, and (4) peer interaction and communication.
- These 4 foundation areas will be integrated into traditional summer camp activities such as movement games and relays, arts and crafts, music, sensory exploration, and pretend play with a focus on having fun in a safe environment.
- These camps are appropriate for children with sensory processing disorders, high functioning autism, attention deficit disorders and other learning challenges, as well as children who are typically developing. Siblings and friends are welcome to enroll!!!!
- Each summer camp will have 4-6 children participating, and will be staffed by an occupational therapist that specializes in pediatric and school-based services. They will be assisted by a student volunteer or local preschool or elementary school teacher.
- Parents are encouraged, but not required, to sign up their camper for all weeks applicable to their child. Signing up for the same camp for two (or three) consecutive weeks provides more consistency for your camper and the therapists.
